

5 WAYS TO LEVERAGE NEW OPPORTUNITIES

There are two type of people in this world, mediocre people and successful people. Successful people become successful because they know how to see opportunity, but most importantly they understand how to leverage opportunity! This FREEBIE will give you 5 key Ways to leverage any opportunity that is on the table. This will help you maximize all opportunities which will help you grow mentally and financially.

1. Identify The Opportunity

In life many opportunities will come but if you don't identify them they will surely pass you by. The first step to leverage opportunity is being able to see and identify it. A couple things may stick out when an opportunity is in front of you.

- A. If you meet someone and how you met them doesn't make sense. 9 times out of 10 that person is someone that you need to know and they are suppose to be aligned with your life.
- B. If you meet someone, or see something that is related to your goal, this is a sign. Attempt to make a connection.

Once you can understand that the first step is to identify that this may be a potential opportunity, you are moving in the right direction.

2. Research the Opportunity

Now that you have identified the opportunity, now its time to research everything you can about that company, that person, that school, whatever that opportunity is. This is going to help you understand everything you need to know in order to make the opportunity become fruitful to you.

3. Create A Plan Of Action

The next phase of understanding opportunity and connecting the dots and creating a plan of action. If it's that job you want, you must write a plan. That car you want, that house, that business opportunity, you must create a plan. That plan may consist of you applying for that job, setting up an appointment to discuss your loan options on your dream house, or having coffee with someone who can push your business in the right direction. In this plan you must make goals and deadlines. Never write a plan without timelines or a goal in mind. Write the plan down and follow through on the goals you set.

4. Execute the plan

Now this is the easy part because once you have the plan on paper, all you have to do is execute the vision with confidence. Now let me back up a bit, yes this seems easy but for most people this can be the hardest part. Note that I used the word confidence. You will not be able to do this at all without confidence. In this stage make sure your plan is firm and solid so that you are ready to move forward with the opportunity arises.

5. Follow Up & Follow Through

This is the most important step to leverage opportunity. You can identify the opportunity, you can research, create the plan and execute but if you dont follow through and follow up with the opportunity all can be lost. One of the many keys to success is consistency. You must follow up with the opportunity.
